Education

Guru Tegh Bahadur 4th Centenary Engineering College Aug 2023 – May 2027
Bachelor of Technology in CSE; CGPA: 7.28

Atal Adarsh Vidhyalaya, Delhi 2021 – 2022
Class XII (CBSE) – 75%

Relevant Coursework

Data Structures & Algorithms (DSA), Database Management Systems (DBMS), Operating Systems (OS), Object-Oriented Programming (OOP)

Experience

Full-Stack Web Developer Feb 2025 – March 2025
Client: Journalist (Kashmir) — fizalakhan.com

- Created a secure MERN stack portfolio and blog application for a journalist with a hidden admin dashboard.
- Built a custom panel for article management without exposing public login paths.
- Ensured 24/7 uptime on free-tier hosting by implementing a backend refresh loop, showcasing agile problem-solving and optimization efforts.

Projects

IgniteQR (Business Review Automation Platform) | *Next.js, TypeScript, PostgreSQL* | Live

- Engineered a QR-based customer engagement platform helping businesses increase online reviews and collect actionable customer feedback.
- Developed end-to-end workflows for review generation, feedback management, customer tracking, business onboarding, and analytics.
- Integrated secure authentication, payment verification, and subscription-based access control for premium business features.
- Built a responsive admin dashboard for monitoring reviews, customers, feedback trends, and business performance metrics.
- Designed scalable REST APIs and optimized PostgreSQL database schemas to efficiently manage business, customer, and review data.

NanoURL (URL Shortener SaaS Platform) | *Node.js, PostgreSQL, Redis, BullMQ, Docker* | Live

- Engineered a high-throughput URL shortener achieving sub-100ms redirect latency through Redis write-through caching.
- Designed a distributed Snowflake ID generator with Base62 encoding to create unique and collision-resistant short URLs.
- Implemented asynchronous click analytics using BullMQ workers to process geographic and User-Agent data without impacting redirect performance.
- Built advanced API rate limiting using a custom Token Bucket algorithm powered by Redis and Lua scripts.
- Containerized services with Docker and optimized backend architecture for scalability and reliability.

Technical Skills

Languages:Java, JavaScript, SQL
Databases & Cloud: PostgreSQL, MongoDB, Redis, Firebase, Convex
Frameworks & Libraries: React.js, Node.js, Express.js
Tools & Architecture: Git, Docker, Apache Kafka, BullMQ, REST APIs, Level Design (LLD)

Achievements

- Secured 2nd position at Microsoft Innovortex Hackathon among 100+ competing teams.
- Successfully cleared Level 1 of Flipkart Grid 6.0 (Software Development Track).
